RE:

February 6, 1968

M E M O R A N D U M

TO: Mr. John W. Warren
Director of Environmental Engineering
The Anaconda Company

FROM: Walter H. Unger

SUBJECT: Ambient Air Sampling at Anaconda Aluminum,
Columbia Falls, Montana

Attached are standard impinger air sample results taken out-plant on November 15, 1967.

The weather was extremely good during this period. Higher than normal winds along ground line gave an opportunity to take these samples in the plant plume.

Respectfully submitted,

Walter H. Unger
